

Parent Help Card
"About Estimate"

Example

Ms. Shannon brought a box of stickers to school on Monday. On Tuesday, she gave 19 stickers to the Math Club students. On Wednesday, she gave 28 stickers to the students who finished their projects early. On Thursday, she had 11 stickers left in her box. About how many stickers did Ms.

Shannon start with on Monday?

- | | |
|----------------------|----------------------|
| a) about 40 stickers | c) about 60 stickers |
| b) about 50 stickers | d) about 80 stickers |

Step 1

Decide what operation you need to use to solve this problem.

Step 2

You need to round the addends, then add the rounded numbers.

$$20 + 30 + 10 = 60$$
