

Equivalent Fractions

Equivalent Fractions - fractions that are the **SAME SIZE, SAME AMOUNT** with **DIFFERENT NAMES**.

$$\frac{3}{6}$$

$$\frac{1}{2}$$

STEPS:

1. Label each fraction.
2. Draw an e-chart. If both fractions are on the e-chart, they are equivalent. Extend the e-chart at least 5 fractions, but you may have to do more!

Skip count by →	1	2	3	4	5	6	7
Skip count by →	2	4	6	8	10	12	14

Represent the same size and same amount

Sometimes you will need to do an e-chart for each answer choice.

Which fraction is equivalent to the shaded model above?

a. $\frac{1}{2}$

1	2	3	4	5
2	4	6	8	10

X

b. $\frac{2}{6}$

2	4	6	8	10
6	12	18	24	30

c. $\frac{2}{8}$

2	4	6	8	10
8	16	24	32	40

X

d. $\frac{3}{4}$

3	6	9	12	15
4	8	12	16	20

X
