

# Rounding

## STEPS:

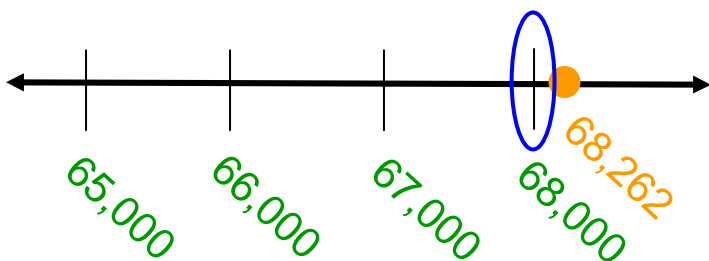

1. Read the question **carefully**. Look for **clues** of what **place value** to round to (i.e. tens, hundreds, thousands, etc)
2. Draw a number line and label your answer choices on it. Also label what is in the middle too.
3. Put a dot and label where your number would be on the number line.
4. Circle the closest answer choice.
